

AlloyOne Metal

QUALITY STATEMENT

Applicable to Primary Magnesium, Magnesium Alloys and Related Products

1. COMPANY OVERVIEW

- AlloyOne Metal is a France–registered trading company specializing in primary magnesium, magnesium alloys and related industrial materials. Our mission is to supply stable, consistent and professionally documented materials to customers in Europe, Asia and North America.

2. OUR QUALITY COMMITMENTS

- Products conform to the specifications defined in the corresponding Technical Datasheets (TDS) and commercial contracts.
- AlloyOne Metal is certified to ISO 9001 for its quality management system.
- Physical inspection is performed prior to shipment, covering surface condition, oxidation level, palletizing, bundling and packaging integrity.
- All supplied materials originate from screened and continuously evaluated production partners.
- Each shipment is handled according to standard industrial packaging practices to ensure protection during transportation and handling.
- AlloyOne maintains a controlled documentation system including TDS, SDS, HS Code Reference, Packaging Notes and shipment records.

3. PRODUCT CONFORMITY

- AlloyOne ensures that each shipment matches the contractual chemical composition, physical form, packaging requirements and quantity.
- No commitment is made beyond the specifications defined in the contract and the official TDS.
- AlloyOne does not provide performance warranties related to downstream processing, alloying behaviour, casting performance or end-use application results.

4. SUPPLY CHAIN & INSPECTION POLICY

- We cooperate only with qualified and pre-evaluated production partners.
- Prior to shipment, goods are inspected for surface condition, oxidation level, bundling/strapping, pallet condition and packaging compliance.
- Visual documentation (photos, weight records, packing information) may be provided upon request.
- AlloyOne does not engage in manufacturing activities and does not issue factory-level certificates.

5. TRACEABILITY

- AlloyOne maintains batch-level traceability for each shipment, including loading information and shipment identifiers.
- Traceability does not extend to manufacturing processes beyond what is provided by the original production source.

6. COMPLIANCE

- Solid magnesium and magnesium alloy ingots are not classified as hazardous substances under EU CLP or OSHA HCS.
- AlloyOne provides a Safety Data Sheet (SDS) applicable to solid magnesium/alloy products.
- HS Code information is provided for classification reference only.
- Buyers are responsible for ensuring compliance with import regulations, REACH registration status and country-specific requirements.
- AlloyOne does not undertake import procedures or regulatory filings on behalf of buyers.

7. DISCLAIMER

- This Quality Statement is provided for information purposes only.
- AlloyOne does not assume legal obligations beyond the contractual terms agreed with the buyer.
- No guarantee, warranty or representation is made regarding manufacturing origin, metallurgical performance, suitability for specific end-uses or regulatory compliance in the country of import.
